Sorry for the delay...on 4/3, i wrote this in my memo instead of texting it to you. If this is too long...i can rewrite:
I am a recipient of the specialized cardiovascular training from (James Stuart). It has opened many doors of opportunity throughout my career path. After traning, I began work as an EKG monitor technician for a CVICU while attending college during the evening. Once i tranferred to a university, I was able to use my CV skills to obtain a position at a nearby hospital. Upon graduation, i was hired to work in the Cath Lab for a few years before beginning a career in cardiovascular pharmaceutical sales.

I believe the training you will receive from this program is invaluable and can expose you to many different areas of opportunities. Your contributions to the health care industry will prove beneficial to many healthcare providers as you work together to improve lives and help others. I would highly recommend the JSCVP.

Sent from my Sprint Samsung Galaxy Phone.
